

MyApproved Developer Build Plan - Phase 1

This is the full breakdown of what needs to be built for Phase 1 of MyApproved. This is not a wishlist. This is what must be delivered.

MODULE 1: HOMEPAGE SETUP

1.1 Logo Placement

- Add MyApproved logo to the top-left of the header (desktop and mobile).
- Add favicon to browser tab.
- Ensure logo is visible on all screen sizes with correct proportions.

1.2 Search Bar Functionality (Trigger AI Flow)

- Search bar should activate a modal or redirect to a 4-step AI Quote Form.
- Must be responsive and smooth across devices.

1.3 UI Consistency

- Copy the exact visual quality of the homepage (font, spacing, buttons, inputs).
- Use the same design system across all screens.

MODULE 2: 4-STEP AI QUOTE SYSTEM

2.1 Form Steps

- Step 1: Select trade (dropdown with all possible trades)
- Step 2: Describe the job (textarea + image upload + urgency dropdown)
- Step 3: Enter postcode and select availability (calendar)
- Step 4: Display AI-generated price estimate based on trade + location + urgency

2.2 AI Price Logic

- Use a backend function or mock data to provide an estimated price range (e.g., plumber in London = £100-£200)
- Display: "This is an AI-generated quote. Your selected tradesman may quote differently."

2.3 Output

- On submit, store job details in DB.
- Send lead to GoHighLevel CRM.
- Option: Allow client to select a tradesman or wait for offers.

MODULE 3: ACCOUNT SYSTEM

3.1 User Types

- Two roles: Client and Tradesman.
- Register/Login with email + password.
- Email verification required.
- Password reset flow.

3.2 Dashboard Routing

- Client dashboard: /client/dashboard

- Tradesman dashboard: /tradesman/dashboard

MODULE 4: TRADESMAN ONBOARDING

4.1 Required Docs

- All tradesmen must upload: ID, insurance, proof of qualifications.
- Mandatory for Plumbers, Electricians, Aircon Engineers: upload trade card.

4.2 Admin Approval System

- All docs reviewed manually from admin dashboard.
- Tradesmen cannot apply for jobs until verified.

MODULE 5: JOB BOARD SYSTEM

5.1 Client Job Post

- Client fills in: Trade, Job Description, Postcode, Budget, Images, Preferred Date.
- Posts get stored in DB + CRM.

5.2 Tradesman View

- Tradesmen only see jobs that match their selected trades + radius.
- "Apply" or "Accept" button triggers job lock.

5.3 Job Locking Logic

- Once a tradesman accepts, job is removed from board.
- Job shows as "In Progress" on both dashboards.

MODULE 6: DASHBOARDS

6.1 Client Dashboard

- View all posted jobs.
- See tradesman responses.
- Leave reviews after job complete.

6.2 Tradesman Dashboard

- See new job listings.
- Upload and manage documents.
- Manage accepted jobs.

MODULE 7: REVIEWS & GOOGLE INTEGRATION

7.1 Internal Reviews

- Clients can leave 1–5 star rating + text review.
- Display on tradesman's profile.

7.2 Google Sync (Optional)

- If tradesman links Google My Business, sync reviews to GMB page.

MODULE 8: CRM INTEGRATION

- All job leads should sync into GoHighLevel.
- Include job details, client info, and time of submission.

MODULE 9: NOTIFICATIONS

- Email or SMS alerts for:
 - New jobs matching a tradesman's filters
 - When a job is accepted
 - Message notifications
 - Document approval/rejection

UI/UX REQUIREMENT (GLOBAL)

- Use consistent UI across all modules.
- Buttons, inputs, typography, layout = same standard as homepage.
- Responsive for mobile/tablet/desktop.
- No broken flows, dead links, or unstyled components.

FUTURE FEATURES (Do Not Build Yet)

- Payment system (Stripe or GoCardless)
- AI chatbot to assist job form completion
- AI-powered quote builder for tradesmen
- Cross-sell recommendations
- Dispute resolution flow
- Admin analytics dashboard

FINAL INSTRUCTION

This is not an MVP. Build this with quality. If any part is unclear, ask before building. Every module must work independently.
